**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Claims 1-19 and 47-55 in Paper No. 7 is acknowledged.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,7,47,50,54 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Anderson et al. (5,610,640).

With respect to Claims 1,7,47,50,54, Anderson teaches the 24, the printhead that vertically moves on an axis perpendicular 40(see column 4, lines 36-38) to the production path 22(conveyer belt) allow the printhead to be cleaned in figure 1 and column 4, lines 55-65, the service station assembly 42 having a waste ink receptacle that horizontally moves in an axis parallel 50 to the production path 22 in figure 1 and the software commanded motors 62 (figure 2) by controller 32 in figure 1.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson.

With respect to Claim 2, Anderson teaches all the claim limitations except that a vertical drive screw moves the print head vertically. However, Anderson teaches that the printhead is vertically moved in figure 1 and column 4, lines 36-38 and the use of lead screws in figure 1. It would have been obvious to one of ordinary skill in the art to duplicate the service station lead of Anderson for use with the printhead because lead screw technology is a reliable and cost effective method of moving printing structures. Applicant's attention is also invited to the following case law regarding the duplication of parts: In re Harza, 274 F.2d 669, 124 USPQ 378 (CCPA 1960) (Claims at issue were directed to a water-tight masonry structure wherein a water seal of flexible material fills the joints which form between adjacent pours of concrete. The claimed water seal has a "web" which lies \*\* in the joint, and a plurality of "ribs" \*\* >projecting outwardly from each side of the web into one of the adjacent concrete slabs. <The prior art disclosed a flexible water stop for preventing passage of water between masses of concrete in the shape of a plus sign (+). **Although the reference did not disclose a plurality of ribs, the court held that mere duplication of parts has no patentable significance unless a new and unexpected result is produced.**). With respect to Claim 55, Anderson teaches all the claim limitations except for the continuous web. However, it would have been obvious to one of ordinary skill in the art to incorporate a continuous web to replace the sheets of Anderson because paper webs and sheets have similar cost and performance.

***Allowable Subject Matter***

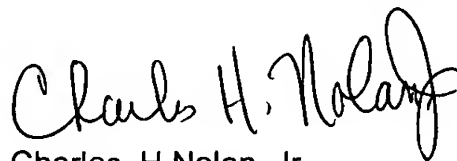

6. Claims 3-6,8-19,48-49 and 51-53 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: The Examiner reserves comment until the entire instant application is in condition for allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles H Nolan, Jr. whose telephone number is 703-308-0961. The examiner can normally be reached on Monday through Thursday 8:00 AM to 6:30 PM.
